

**United States Department of Commerce Import
License Branch
Gold Form
Type #53021A, 2011 Version**

All questions must be answered fully by the supplier of gold/gold dust. Failure to comply may result in denial of your application to export. If you require additional space for your answers, write them on the last page.

Section 1: Basic information

Name: _____ Date: _____

Present address:

Organization (if applicable): _____

Reference code (should be given by the purchaser). PLEASE WRITE IN LARGE AND LEGIBLE BLOCK LETTERS:

How much gold are you shipping? ___ kilograms

What form is the gold in? Gold dust Gold bars Other (specify): _____

Have you shipped gold to the United States of America before? Yes No

Section 2: As per US Code 6969(a), all gold importers must document all their dealings with alleged or confirmed criminal/terrorist organizations.

Define terrorism:

Have you ever sold gold to a terrorist organization, or an organization you suspected of being one?

If yes, list all the terrorist organizations you have sold to:

1. _____
2. _____
3. _____

Have you ever been contacted by any of the following organizations? Circle all that apply:

Casa Nostra
The Watchtower Apocalyptic Testament Church
Green Party
Los Zetas
Shining Path
Church of Shiverism

Did you sell gold to any of these entities? Yes No

If so, list amounts and purity of the gold you sold them, as well as the specific organization you sold to:

1. _____
2. _____
3. _____

Have you ever sold gold to a criminal organization, or an organization you suspected of being one? Yes No

If yes, list all the criminal organizations you have sold to:

1. _____
2. _____
3. _____

Have you ever been indicted on terrorism/violent crime charges? Yes No

Explain:

How much revenue have you received from gold exports in the last 365 days/year?
_____ USD

Section 3: As per US Code 6969(b), all gold imports must be certified to have originated from ethical sources.

Where was your gold mined? If it was mined from multiple locations, list each, separating each location with a semicolon.

Was your gold ore mined in an active conflict zone?

If so, what conflict zone was it mined in?

Do you use child labor to mine/refine ore? Yes No

When did you stop using child labor to mine/refine ore (MM/DD/YY)? ____/____/____

Have you/your organization ever received complaints about unethical labor practices?

If so, explain:

Do you believe it is acceptable to require miners to work 18 hour shifts? Yes No

Explain:

Do you/your organization require miners to work 18 hour shifts? Yes No

Explain:

What measures have you taken to ensure the safety of your miners?

SPECIAL INSTRUCTIONS: The Import Licensing Branch suggests an analysis expert complete Sections 4 & 5. If applicant does not have expert on staff/available, applicant should answer all questions to the best of his knowledge.

Section 4: As per US Code 6969(c) all gold imports must be certified to have been handled safely.

What chemical(s) was/were used in stage 1 treatment of gold ore? Place a clear 'X' in all that apply.

- Potassium cyanide
- MDMA
- Triammincobalt(III)-m-trihydroxotriammincobalt(III)
- Dihydrogen monoxide

Explain your choices, emphasizing safety and societal implications.

Was arsenic or fructose-free corn syrup used as an additive in your refinement process?
Yes No

Situation question: READ CLOSELY:

Jack and Robert are refining 5 kilograms of gold ore. Jack first mouth-pipets 10 liters of 1 M solution of potassium cyanide/MDMA onto the ore. After heating the slurry in an industrial furnace and allowing the gold five minutes to complexate, Robert transfers the slurry into a George Foreman Aerogel Gravity Displacement Column and administers the tetrahydrocannabinol burn test. After the slurry partitions, the gold-containing component is dissolved in a solution of dihydrogen monoxide. Finally, 1 L of concentrated hydrochloric acid is added at once to the monoxide solution to obtain solid-state gold.

List at least three (3) unsafe practices demonstrated in this scenario:

1.

2.

3.

4.

5.

Are United States Department of Commerce-approved Tosser® Dewars used to transport your gold/gold dust? Yes No

Why or why not?

Tiberium is an uncommon byproduct of gold refining, taking the form of green and/or blue crystals. Estimate the percent (by mass) of original gold ore converted to tiberium in the refining process: _____ % (blue) _____ % (green)

Section 5: Gold purity measurements.

What is the purity of your gold? ___ karats

On a scale of 1 to 10, with ten being the highest, how you rate the accuracy of your purity determination? _____

What tests did you use to verify purity? Place a clear 'X' in all that apply.

- Archimedes water submersion test
- 'Exposed posterior' test
- High-intensity x-ray laser aerogel nuclear dissonance spectroscopy (HXLANDS)
- Tetrahydrocannabinol burn test
- TSA junk scan

Explain why you used these tests:

Is the coloration of your gold consistent with your determined purity? Yes No

If yes:

What is the wavelength of absorption for your gold sample*? _____ nm

This corresponds to a superultraviolet color rating of (circle one):

Dark magenta Cyan Moderator green Scarlet Premium yellow

How many trials did you run**? _____

What is the standard deviation of your wavelength measurement***? _____ nm

Which of the following machines did you use to make your determination? Circle all that apply:

- M68 Nonlinear Induction Motor
- Dihelical Occlusion Ray Asymmetrizer
- Hawking Radiation Spectrophotometer

*Acceptable values range from 300 to 700

**Acceptable values range from 5 to 300

***Acceptable values range from .5 to 30

If no:

Did you carry out additional tests to ensure the purity of your gold?

Provide a reason for discoloration of your gold sample.

I, the undersigned, vouch that all the information I have provided is correct to the best of my knowledge.

Signature Date _____

**DO NOT WRITE IN THIS AREA
IMPORT LICENSING BRANCH USE ONLY**

Application received (MM/DD/YY): ___ / ___ / ___

Approved ___ Denied ___

Clerk signature: _____ Date: _____
